1 Introduction

The Project [Wan Chai Development Phase II – Central - Wan Chai Bypass at Wan Chai West (Contract No. HK/2012/08)] is part of the Central-Wan Chai Bypass including its Road Tunnel and Slip Roads covered under the Environmental Permit No. EP-364/2009/G.

China State – Leader Joint Venture was granted on 5 March 2013 a Further Environmental Permit (No. FEP-09/364/2009/B) for the Contract No. HK/2012/08 under the master Environmental Permit No. EP-364/2009/B. A Further Environmental Permit (No. FEP-12/364/2009/D) for the Contract No. HK/2012/08 under the master Environmental Permit was granted to China State – Build King Joint Venture (CSBKJV) on 1 August 2016 upon change of company name from China State – Leader Joint Venture.

The scope of works for Contract No. HK/2012/08 under the FEP-12/364/2009/D mainly includes:

- Construction of a dual three-lane trunk road tunnel of approximately 310m in length (including the substructure of Middle Ventilation Building) and two slip roads.

The works area under FEP-12/364/2009/D is shown in Appendix I.

Under Condition 2.14 of Part C of the FEP-12/364/2009/D, a landscape plan has to be prepared and deposited by the permit holder to the EPD at least one month before the commencement of corresponding parts of landscape works of the Project.

The purpose of this Landscape Plan is to demonstrate the design details, locations, implementation programme, maintenance and management schedules, and drawings of the landscape and visual mitigation measures of the Project so as to reduce the landscape and visual impact during construction stage of the Project.

CITIC Tower (C14), Fleet Arcade (C15), Grand Hyatt Hotel (C22) and Hong Kong Convention and Exhibition Centre (C24) are identified to be the key Visual Sensitive receivers (VSRs) that will be affected during the construction phase of the Project. C14, C15, C22 and C24 are mapped in Appendix II.

CSBKJV is responsible for implementing a series of “Construction Phase Landscape and Visual Mitigation Measures” as stipulated in the approved Environmental Impact Assessment (EIA) Report for Central-Wan Chai Bypass and Island Eastern Corridor Link (Register No.: AEIAR-041/2001) and the EIA Report for Wan Chai Development Phase II and Central-Wan Chai Bypass (Register No.: AEIAR-125/2008).

The requirements on landscape and visual mitigation measures during construction under the respective EIA reports are summarized as below:

Landscape and Visual Mitigation Measures	Requirements in EIA Report AEIAR-041/2001	Requirements in EIA Report AEIAR-125/2008	Corresponding Sections in This Landscape Plan

The requirements on under the approved Environmental Impact Assessment (EIA) Report for Wan Chai Development Phase II and Central-Wan Chai Bypass (Register No.: AEIAR-125/2008) are summarized as below:

ID No.	Landscape and Visual Mitigation Measures
OM1	Aesthetic design of buildings and road-related structures, including viaducts, vent buildings, subways, footbridges and noise barriers and enclosure.
OM2	Shrub and Climbing Plants to soften proposed structures.
OM3	Buffer Tree and Shrub Planting to screen proposed roads and associated structures.
OM4	Aesthetic design of proposed waterfront promenade.
OM5	Aesthetic streetscape design.
OM6	Aesthetic design of roadside amenity areas.

The operation mitigation implemented for the Project shall refer to the Final Landscape Plan under the Further Environmental Permit (No. FEP-02/376/2009) for the Contract No. HK/2012/08.

2 Landscape Works

(I) General

- Topsoil, where identified, should be stripped and stored for re-use in the construction of the soft landscape works, where practicable;
- Tree survey reports, which are associated with the tree transplantation, tree felling and tree preservation, should be submitted to the Engineer and subject to the Engineer's approval;
- Despite the EIA reports not specifically mentioning the tree preservation, protection and transplanting arrangement at the site areas under this Contract, CSBKJV will endeavor to carefully execute the tree preservation, protection and transplanting works accordingly.
- The trees to be retained, transplanted and felled shall follow the tree survey plan (Drawing No. 60041297/C3/100/1600B) as shown in Appendix III;
- The survey of trees has been conducted and the latest survey result is shown in the tree survey schedule in Appendix IV;
- Photos of all trees (from tree groups 1 to 8) to be transplanted and retained are shown in Appendix X;
- Progress photos of all the transplanted trees at tree nursery will be separately provided to the Planning Department on a bi-monthly basis by Contractor;
- Progress photos of all the retained trees on site will be separately provided to the Planning Department on a bi-monthly basis by Contractor.
- The tree planting works under the Further Environmental Permit (No. FEP-12/364/2009/D) for the Contract No. HK/2012/08 shall refer to the Final Landscape Plan under the Further Environmental Permit (No. FEP-02/376/2009) for the Contract No. HK/2012/08.

(II) Tree Preservation and Protection

- Existing trees to be retained on site should be carefully protected during construction;
 - Trees to be preserved are those with status 'Retain' as per Drawing No. 60041297/C3/100/1600B and those with status 'Transplant' when they are still within the site and during the period of transplanting operations until they are moved to their receptor sites;
 - Relevant protection and horticultural / preservation measures are to be carried out during the construction period should there be any adjacent
-

works that may create physical damage to trees, soil compaction, change in ground levels, excavation/ trenching, drilling and instability including pruning and control of pest and disease where applicable;

- As a precautionary measure, preserved trees shall be temporarily fenced-off or provided with trunk protection where applicable to avoid any damage;
 - The temporary protective fencing shall be 1500-2000mm high, and shall ideally be constructed of strong, impenetrable material such as steel sheet or wooden board;
 - In certain circumstances where space for tree protection is a particular problem, protection of the tree trunk with planks will be adopted. In these cases, the ground within the root zone should be protected from compaction with mats and gravel or boards/tracks for vehicles. (It should be noted that these treatments should only be used temporarily so that anaerobic soil conditions do not build up in the root zone);
 - Referring to Drawing No. 60041297/C3/100/1600B, 6 numbers of trees would be retained under Contract No. HK/2012/08. However, the trees (T0602) and (T0601) were found to be not in a good condition as advised by the Independent Tree Specialist. The trees (T0602) and (T0601) were felled by Leisure and Cultural Services Department (LCSD) on 11 February 2014 and 24 September 2014 respectively. The advice from LCSD is shown in Appendix XIII. Hence, a total of 4 trees will be retained.
 - Should there be further trees identified, the trees will be retained in the first instance until agreement with the Engineer is sought.
 - Progress photos of all the retained trees on site will be separately provided to the Planning Department on a bi-monthly basis by Contractor.
 - Tree groups 9 (91 trees) and 10 (6 trees), as shown in Appendices XI and XII, had been transferred from CEDD Contract No. HK/2009/01 to CSBKJV for general maintenance with status “Retain” in February 2014. In January 2015, 79 trees in tree group 9 had been handed over from CSBKJV to SCL Contract No. 1128. The locations of the trees handed over to SCL Contract No. 1128 are shown in Appendix XI. The protection and preservation of existing trees on site was certified as substantially completed on 23 November 2018 as shown in Appendix XI.
-

(III) Tree Transplanting

- Trees unavoidably affected by the construction works should be transplanted where practicable;
 - Trees identified to be transplanted will be labelled with its corresponding tree numbers as marked according to the Drawing No. 60041297/C3/100/1600B;
 - Trees will be transplanted to temporary off-site holding nursery as shown in Appendix V;
 - The holding nursery will be maintained with care;
 - The final permanent locations of the transplanted trees are to be confirmed on site with the Engineer;
 - The planting plans with plant schedules specifying plant species, sizes, spacing and quantities for the landscape works are shown in Appendix VI;
 - A 12-month maintenance period will be provided for the trees after planting;
 - Post-transplanting maintenance works will be conducted including general maintenance works during the transition period and when the trees are kept in the temporary holding nursery before being transplanted back to the Contract Site (to be agreed with the Engineer) or the establishment period;
 - A total of 37 trees is recommended to be transplanted under Contract No. HK/2012/08 according to the Drawing No. 60041297/C3/100/1600B. The tree (T0337) with status "transplant" remains on-site as no site possession for this tree is necessary. No transplant for this tree (T0337) is carried out. The Tree (A136) which is found on-site is not shown in the tree transplanting plan. This particular tree had been handled with care on site and this tree had been transplanted to the off-site holding nursery upon advice by the Independent Tree Specialist and agreement with the Engineer. A total of 37 trees are to be transplanted accordingly. However, the trees T0133 and T0134 which are shown in the tree transplanting plan cannot be found on-site. It was found that these two trees had been transplanted and maintained under Contract No. HK/2009/01. Hence, there will be only a total of 35 trees to be transplanted under Contract No. HK/2012/08 including the newly identified tree (A136).
-

Transplanted trees (T604), (T608), (T0609), (T0611), (T0612), (T0613), (T0618), (T0619), (T0620) and (T0468) were felled at the tree nursery. These felled trees will be compensated under Contract No. HK/2012/08 based on the Technical Circular (Works) No. 7/2015 – Tree Preservation. The summary of these 10 felled trees is shown in Appendix X.

- The transplanted trees (25 trees) in the holding nursery were transplanted to the receptor site at the Cross Harbour Tunnel Approach Rest Garden at Gloucester Road from 18 July 2019 to 20 July 2019. The tree planting plan and the handover record for transplanted trees at the Cross Harbour Tunnel Approach Rest Garden at Gloucester Road are shown in Appendix XIV. The 10 compensatory trees were transplanted to the EP-376 Area under Contact No. HK/2012/08 as shown in Appendix VI. The two transplanted trees (T472 and T490) which were once not acceptable to LCSD due to major structure defects received no objection from the LCSD to stay at the receptor site at the Cross Harbour Tunnel Approach Rest Garden at Gloucester Road for establishment works under WDII (Refers to Appendix XIV).

(IV) Tree Felling

- Trees identified to be felled will be labelled with their corresponding tree numbers as marked according to the Drawing No. 60041297/C3/100/1600B;
- The trees to be felled are approved by the Lands Department - the District Lands Office (DLO);
- The trees to be felled will be cut and removed under close supervision;
- A total of 11 trees will be felled on-site under Contract No. HK/2012/08 according to the Drawing No. 60041297/C3/100/1600B.

(V) Compensatory Tree Planting

- Compensatory tree planting during the transplanting stages, as the case may happen, shall replace the transplanting trees being certified dead or damaged as to be in agreement with the Engineer;
 - Replacement shall be of new trees of the same species and of similar size;
 - If replacement of the same size could not be found in the market, CSBKJV will provide alternatives for the Engineer's approval.
-

- 10 compensatory trees were transplanted to the EP-376 Area under Contract No. HK/2012/08 as shown in Appendix VI.

Below is the Table which shows the latest tree status:

Description	No. of trees
Total number of transplanted trees to tree nursery site under FEP-12/364/2009/D by Contract No. HK/2012/08	35
Number of transplanted trees to EP-376 Area by Contract No. HK/2012/08	0
Number of transplanted trees to the Cross Harbour Tunnel Approach Rest Garden at Gloucester Road by Contract No. HK/2012/08	25
Number of felled trees at tree nursery site of Contract No. HK/2012/08	10
Number of compensatory trees to EP-376 Area under Contract No. HK/2012/08	10

3 Erection of Decorative Screen Hoarding (Completed)

(I) Sources of Landscape Impact

Sources of impact during the construction phase would include:

- Tunnel construction;
- Diaphragm wall construction;
- Middle ventilation building sub-structure construction;
- Road formation and earthworks;
- Construction site traffics;
- Night-time lighting and welding; and
- Dust accumulation during dry weather.

(II) Location, Design and Fixing Details of Hoarding

The location plan of the decorative screen hoarding for WDII under the Project is shown in Appendix VII and the graphic panels for decorative screen hoarding and its fixing details are shown in Appendix VIII. Liaison and discussion with the owner of Fleet Arcade (C15) will be made before and during the construction works in the vicinity for the mitigation measures on the potential visual impact to them.

4 Control of Night-time Lighting (Completed)

The Night-time Lighting mentioned in Section 4 has made reference to the Guidelines on Industry Best Practices for External Lighting Installations issued by the Environment Bureau dated January 2012.

(I) Sources of Impact

Sources of impact in the night-time construction phase would include:

- Tunnel construction;
- Diaphragm wall construction;
- Middle ventilation building sub-structure construction;
- Road formation and earthworks;
- Construction site traffics;
- Night-time lighting and welding.

(II) Control Measures

- Any night-time work that needs to be conducted will be carefully planned to minimize the amount of external lighting that would be required;
 - The use of equipment headlights / lighting will be first evaluated to determine sufficiency based on the task and to minimize the use of portable lighting devices;
 - External lighting from plant and equipment will be switched off when not needed or after night-time works;
 - Only essential lighting (e.g. lighting for safety and security) will be maintained at the acceptable level as required;
 - Over-illumination of works areas will be avoided to minimize the possibility of light pollution;
 - The lighting will be positioned and aimed to avoid overspill of light to outside the works areas being lit up
 - External lighting from plant and equipment will be appropriately positioned, aimed or shielded so that illumination of nearby roads, if any, will not be adversely affected;
 - Lighting will be directed towards work areas and away from neighboring properties;
 - Proper siting of construction activities on the layout can reduce a potential lighting nuisance;
 - Lighting will be switched off when it is not operationally required or dimmed down when a high illumination level is not essential;
-

- In the event that the portable lighting devices be used, they will be orientated away from visual sensitive areas and used sparingly when required. The masts of the lighting will be kept at distances that would minimize the nuisance of light to the neighbouring community, while still providing a safe working environment for workers involved in the task; and
- Use of vegetative and landscape buffers and other site and project elements will be adopted.

5 Implementation Programme, Maintenance and Management Schedule (Completed)

(I) Implementation Programme

Item	Mitigation Measures	Location / Timing
Landscape Works	Retain, protect and transplant of trees	Entire Works Areas and Throughout Construction Period
Decorative Screen Hoarding	Erection of Decorative Screen Hoarding	Entire Works Areas and Throughout Construction Period
Night-time Lighting	Control of Night-time Lighting	Entire Works Areas and Throughout Construction Period

(II) Maintenance and Management Schedule

The implementation schedule for landscape and visual mitigation measures is shown in Appendix IX and the details on maintenance and management schedule is shown below:

Item	Maintenance and Management Schedule
Landscape Works	<ul style="list-style-type: none"> • Tree protection measures will be provided daily and checked by tree supervisor routinely; • Tree transplanting works will be carried out by independent tree specialist and experienced sub-contractor under the supervision of consultant and main contractor; • Maintenance works for tree planting are implemented on a regular basis under FEP-02/376/2009 according to the horticultural year plan in Appendix XV.
Decorative	<ul style="list-style-type: none"> • Daily cleaning will be carried out to prevent accumulation of

Item	Maintenance and Management Schedule
Screen Hoarding	<p>debris along the site boundary area and weekly inspection will be carried out to maintain the apparent quality of the decorative screen hoarding; and</p> <ul style="list-style-type: none">• If any damage is identified, repairing works will be carried out as soon as possible for the affected decorative screen hoarding panels.
Night-time Lighting	<ul style="list-style-type: none">• Designated site personnel will monitor the lighting impact during night-time construction work; and• Lighting devices will be repositioned, redirected, lowered or shielded immediately if any public concern or complaint is received.

NOTES:

- THIS DRAWING TO BE READ IN CONJUNCTION WITH DRAWING NOS. 60041297/C3/SSK2465 & 2466.
- GROUND PREPARATION: GROUND PREPARATION SHALL BE CARRIED OUT TO ALL PLANTING AREAS AS SPECIFIED.
- SOILING: ALL PLANTING AREAS SHALL RECEIVE SOIL MIX AS SPECIFIED IN PARTICULAR SPECIFICATION OF THE CONTRACT.
- PLANTING PATTERN: ALL PLANTS ARE TO BE PLANTED IN STAGGERED PATTERN AT SPACING INDICATED IN THE SCHEDULE. ALL ACCENT PLANTS SHALL BE GROUPED AT THE FRONT OF PLANTING AREAS.
- ALL TREES SHALL BE PLANTED AT LEAST 2M AWAY FROM ROAD KERB TO AVOID BLOCKAGE OF SIGHTLINE OF ROAD USERS.
- ALL TREES SHALL BE PLANTED AT LEAST 2M AWAY FROM ADJACENT PRIVATE LOTS' BOUNDARIES.
- TREE PLANTING: LOCATION OF TREES AND SPACING SHOWN ON DRAWINGS IS INDICATIVE. THE CONTRACTOR SHALL AVOID UNDERGROUND UTILITIES WHEN PLANTING.
- MULCHING: ALL PLANTING AREAS SHALL RECEIVE MULCH TO A DEPTH OF 75MM. FINISH LEVEL OF MULCH SHALL BE 25MM BELOW ADJACENT FINISHED SURFACES.
- WATER POINTS: LOCATIONS OF WATER POINTS SHOWN ON DRAWINGS ARE INDICATIVE. EXACT LOCATIONS TO BE DETERMINED ON SITE.
- ESTABLISHMENT WORKS: ALL PLANTED MATERIALS SHALL BE MAINTAINED AFTER PLANTED FOR A PERIOD AS SPECIFIED IN THE CONTRACT DOCUMENTS.
- UNDERGROUND UTILITIES: NO TREES SHALL BE PLANTED AS FAR AS PRACTICAL WITHIN 1M OF DRAINAGE U-CHANNELS, OR ANY KINDS OF PIPES/ DUCTINGS. THERE SHALL BE NO PLANTING WITHIN 1.5M AROUND THE COVER OF ALL VALVES, OR 1M FROM HYDRANT OUTLETS.
- IF ANY OF THE PROPOSED TREES ARE FALLEN WITHIN THE RESTRICTED ZONE AS DESCRIBED IN NOTE 11, ROOT BARRIERS SHALL BE PROVIDED AS PART OF THE TREE PLANTING COST FOR EVERY INDIVIDUAL TREES, AS PER HYD STANDARD DRAWING NOS. H5138 TO H5141 AND THE CONTRACTOR SHALL PROVIDE AND PROPOSE THE DETAILS FOR EACH INDIVIDUAL CONDITIONS DETAILS OF ROOT BARRIERS FOR THE APPROVAL OF THE ENGINEER.
- THE EXACT FINAL TRANSPLANTED TREE LOCATIONS AND SETTING OUTS SHALL BE DETERMINED ON SITE.
- SOIL MIX AND SOIL CONDITIONER: SOIL MIX SHALL CONSIST OF FRIABLE COMPLETELY DECOMPOSED GRANITE AND SOIL CONDITIONER IN THE PROPORTION AS 3:1 BY VOLUME AND SHALL BE FREE TO DELETERIOUS MATERIALS AS SPECIFIED IN G.S. CLAUSE 3.30. SOIL MIX AND G.S. CLAUSE 3.31 FOR SOIL CONDITIONER.
- STAKING: BAMBOO STAKES SHALL BE USED FOR ALL TREES EXCEPT WHIPS AS SPECIFIED IN G.S. 3.36. TREE TRUNKS SHALL BE PROTECTED BY USING RUBBER HOUSE PROTECTIVE SLEEVING OR SIMILAR, AND SHALL BE LOOSENED TWICE A YEAR.

Dear Mr MA,

I refer to your preceding email dated 9.4.2018 regarding a tree felling case at Fenwick Pier Street. For information that the tree in concern was obviously dead and was growing on UUGL. As such, this office had removed it in early April 2018 for the sake of public safety.

Dear Mr. Ngai,

We spoke.

Please find attached photos of the tree (T0495) (*Hibiscus tiliaceus*) for your reference. It was observed that the tree was damaged after Typhoon Mangkhut on 16 Sep 2018 and the tree was removed subsequently. Grateful if you could advise if the tree was removed by LCSD and on what date for our record only.

Thanks,

Dear George,

Please note my email recording the LCSD's agreement to the two trees (i.e. T472 and T490) at captioned location.

Regards,

Jacob

Dear Philip,

Grateful for your record to have your attention:

1. As discussed on 6 Dec 2019, further to the attached LandsD's letter dated 3 Dec 2019 (Q30588), LCSD have no objection for the two transplanted trees (i.e. **T472** and **T490** as highlighted yellow in attached Site Sketch No. 60041297/C3/2650) continue to stay at Site B for establishment works under WDII;

2. On 31 Dec 2019, we note that LCSD have removed the staking bamboo supporting the transplanted trees at Site B. Please refer to attached photos for your retention.

Thanks.

Regards,

<u>Item</u>	<u>Discussion</u>	<u>Action</u>
1.0	<u>Introduction</u>	
1.1	Further to the joint inspection held on 24 July 2019 was recorded by the AACL's letter ref. WDII/(HK/2012/08)/M15/930.9/R16908 dated 9 August 2019. This meeting was held to inspect the completed rectifications, the condition of 8 nos. of transplanted trees, and confirm commencement of establishment period at Cross Harbour Tunnel Approach rest garden as shown in Site Sketch No. 60041297/C3/SSK2650 enclosed in Appendix A .	Noted
2.0	<u>Inspection and Discussion</u>	
2.1	The trees above were inspected by LCSD and the attended parties on 29 August 2019. Please refer to Appendix B for the record photographs.	Noted
2.2	Soil forming "soil ring" and stones at soil were removed. End of bamboo stakes were covered up to prevent stagnant water inside bamboo stakes. LCSD had no comment; Please refer to Appendix E for rectified photos.	Noted
2.3	After 1 month of observation period to 5 nos. of transplanted trees (A021, T170, T469, T487 and T488) since 24 July 2019, the tree conditions were acceptable to LCSD. LCSD advised that the dead branches should be removed during establishment period.	AACL / CSLJV

Please refer to the table below and **Appendix C** for the record photographs.

Tree No.	Chinese Name	Botanical Name	Description
A021	糖膠樹	Alstonia scholaris	Fair Heath and Structure
A170	糖膠樹	Alstonia scholaris	
T469	糖膠樹	Alstonia scholaris	
T487	糖膠樹	Alstonia scholaris	
T488	糖膠樹	Alstonia scholaris	

<u>Item</u>	<u>Discussion</u>	<u>Action</u>
2.4	On 24 July 2019, LCSD did not accept the condition of 3 nos. of transplanted trees (T472, T490 and T605) due to poor health and structure conditions.	AACL / CSLJV

On 29 August 2019, tree no. T605 was acceptable to LCSD.

However, **Trees No. T472 and T490** were not acceptable to LCSD due to major structure defects. AACL advised that tree felling application would be submitted to Lands Department for **Trees No. T472 and T490**.

Please refer to the table below and **Appendix D** for the record photographs.

Tree No.	Chinese Name	Botanical Name	Description
T472	糖膠樹	Alstonia scholaris	Major structural defects
T490	糖膠樹	Alstonia scholaris	Major structural defects
T605	糖膠樹	Alstonia scholaris	Fair Heath and Structure

|-----|--|-----------------|
| 2.5 | LCSD advised that they would carry out shrubs planting in vicinity of the two trees mentioned in item 2.4 after 1 October 2019 tentatively. LCSD advised AACL and CSLJV to take note of interface matter if tree felling to the two trees were proceeded during the period and reinstatement of shrubs should be made if the shrubs were damaged by CSLJV. | AACL /
CSLJV |
| 2.6 | LCSD agreed that the 12-month establishment period to the 23 nos. of tree (i.e. excluding T472 and T490) was started on <u>24 July 2019</u> and ended on 23 July 2020. LCSD requested that next joint inspection should be carried out on 23 October 2019 after 3 months. | AACL /
CSLJV |
| 2.7 | LCSD requested that the maintenance schedule for the 12-month establishment period (EP) should be submitted. | AACL /
CSLJV |
| 2.8 | LCSD reminded AACL and CSLJV to carry out the annual tree risk assessment in accordance with the latest Guidelines for Tree Risk Assessment and Management Arrangement issued by the Greening, Landscaping and Tree Management Section of Development Bureau during the EP and to provide LCSD with copy of completed inspection forms (Form 1 and Form 2) of the tree risk assessment for record purpose: | AACL /
